PROFESSIONAL EXPERIENCE

Remote Developer (Freelancer)   03/2019 – CURRENT

- I've been freelancing since June 2019, specializing in .Net Core, Web API, NoSQL, SQL, AspBoilerplate, ASP.NET, MVC, Azure, GRPC, Event-Bus, Microservices, CQRS, and frontend technologies like HTML, JavaScript, CSS, and jQuery. I've worked on various projects including Slack and Salesforce API integration, community management systems with subscription and cart features, AWS SP API with Keepa Integration, reporting dashboards, asset and revenue management, and utilized Azure, Jira, Git, and DevOps practices.

Senior Software Developer - CureMD   09/2020 – 04/2022

- I've been a Software Developer at CureMD since September 2020, specializing in .Net Core, Web API, ELK, MongoDB, ElasticSearch, RabbitMQ, Angular, MSSQL, and frontend technologies. I've worked on various products, focusing on ELK Stack for logging, RabbitMQ for EventBus, NoSQL databases like MongoDB and ElasticSearch, Redis for caching, and Microservices architecture. Additionally, I've integrated third-party services such as JWplayer.

Software Developer - Cedar Financial   06/2018 – 07/2019

- I was a Software Developer at Cedar Financial from June 2018 to July 2019, focusing on Asp.net, .Net Core, C#, Web API, Angular, MSSQL, MySQL, Ajax, and frontend technologies. My responsibilities included developing dashboards, reporting modules, and various applications for different departments. I'm currently working on a Debt Collection Angular App using Angular and .Net Core API.
